Description

The sculpture is presented as a body suspended in the air, an ellipsoidal volume of polished crystalline resin that seems to defy gravity.

The series developed by Álvaro Quintana and Jesús de la Fuente for DA PROJECT is born from a shared

creation process, in which sculpture is understood as a field of tension between gesture, space and matter.

About the artist

DELAFUENTE / QUINTANA

Álvaro Quintana Escobar (1991), an artist trained in Fine Arts and with a master's degree in Heritage Conservation, and Jesús de la Fuente (1972), artist and sculpture producer, develop a joint practice that is situated at the intersection between sculpture creation, material research and technical knowledge.
