Description

The sculpture stands as a contained body, whose continuous and compact geometry evokes the density and firmness of a human presence.

The series developed by Álvaro Quintana and Jesús de la Fuente for DA PROJECT is born from a shared

creation process, in which sculpture is understood as a field of tension between gesture, space and matter.

About the artist

DELAFUENTE / QUINTANA

Álvaro Quintana Escobar (1991), an artist trained in Fine Arts and with a master's degree in Heritage Conservation, and Jesús de la Fuente (1972), artist and sculpture producer, develop a joint practice that is situated at the intersection between sculpture creation, material research and technical knowledge.
