Description

This sculpture is built from the tension between containment and vibration.

The geometric volume acts as a stable structure that contains an active, almost organic color, which does not limit itself to occupying the matter, but passes through it.

The series developed by Álvaro Quintana and Jesús de la Fuente for DA PROJECT is born from a shared creation process, in which sculpture is understood as a field of tension between gesture, space and matter.

Artwork Details

Half	Steel, Metal, crystalline resin
Edition	8+4PA
High work	60cm
Work width	42cm
Work background	42cm
Work weight	36kg
Weather resistance	No
Color	Black, Red

Shipping dimensions: N/D

About the artist

DELAFUENTE / QUINTANA

Álvaro Quintana Escobar (1991), an artist trained in Fine Arts and with a master's degree in Heritage Conservation, and Jesús de la Fuente (1972), artist and sculpture producer, develop a joint practice that is situated at the intersection between sculpture creation, material research and technical knowledge.
